

The image shows a white gear-shaped device with a blue ring around its perimeter. In the center of the gear is a circular speaker grille with a black mesh. A blue rectangular box is overlaid on the right side of the gear, containing the text "TECMAQ" in white, bold, sans-serif capital letters. The text is arranged in two lines: "TEC" on the top line and "MAQ" on the bottom line.

**TEC
MAQ**

Angle grinder, automatic,
continuous feed:
Continuous production.

Robust construction, reinforced structure
and highly resistant elements to ensure
minimal wear.

Worm designed to adapt to a
variety of fresh and/or frozen
products.

Touch screen /
TECMAQ CONNECT
APP.

Easy daily cleaning.

Minimal, simple and
economic maintenance.
Machines with a long
service life.

CUTTING ELEMENTS

Adapting the cutting worm geometry and with the right set of plates and blades, the TECMAQ grinders guarantee continuous clog-free grinding for products of any nature.

ANGLE GRINDER SYSTEM

Through the ability to vary the speed or adapt it at will for each product, the constant feeding of this angular system provides continuous grinding.

HYGIENE AND CLEANING

Easy access to all hygienically critical points.
Cleaning trolley for worm and accessories.

ELECTRICAL EQUIPMENT

Top brand electrical components to guarantee operation and ease of maintenance, and facilitate maintenance at any power rating.

PRECISION MACHINING

Highest standard machining process to ensure excellent fit of all assemblies. Professionals with vast experience in the sector, applying exhaustive quality control.

REINFORCED DESIGN AND CONSTRUCTION

Every machine has been designed by specialist engineers under the supervision of Josep M^a Zamora, who has more than 40 years' experience in design and manufacture in the sector.

Excellent resistance and structural strength to ensure a long life with minimal maintenance.

TOUCH SCREEN

The TECMAQ touch screen makes the user's work easy.

Easily programmable to adapt to each product to be processed.

Precise information on the processed product. You can check on the processed product at any time, in accordance with references in automatic mode or in kg/h production in manual mode.

Control the machine status, recommended maintenance and long-term guidelines to follow. Avoid unforeseen events and take good care of your machine easily.

TECMAQ CONNECT APP

With the TECMAQ CONNECT APP you have all the information at all times on your mobile device.

Through the APP you can:

- Set process programmes.
- Consult production.
- Check working hours.
- Current status of machine, upcoming technical servicing or maintenance history.
- Consult information and characteristics of the machine.
- Update the software.
- Secure mode for data transfer via Bluetooth.

ALIMAT

ALIMAT 130/2

ALIMAT 114

ALIMAT 200

PREMAT

Mixer Grinder,
for fresh or frozen products.

It allows an automatic mixing process for the products before grinding begins. Large hopper capacity, alternating stop and go motion to obtain constant feeding, without pressurising or heating the product, of the mincing worm.

PREMAT 160

OPTIONS AND ACCESSORIES

Touch screen / TECMAQ CONNECT APP

2nd gear for greater power and production

Mixing paddle in the hopper

Separator set

Trolley loader (100 L or 200 L)

CO₂, N₂ or Steam injection

Cleaning trolley

Temperature control on outlet nozzle

ALIMAT 160/2

MORE THAN 35 YEARS DESIGNING, MANUFACTURING AND DISTRIBUTING HIGH QUALITY FOOD PROCESSING MACHINERY

When Josep M^a Zamora and Jaume Roca founded TECMAQ in 1985, they were aware that they had to design an innovative machine in order to break into the market and stand out. To do that, they listened to distributors, engineers, technologists, maintenance technicians, users, etc. with sufficient eagerness and flexibility to modify, redesign and manufacture the supplements or adaptations necessary to achieve maximum satisfaction and confidence in the end result.

We have maintained this talent over the years and gathered the experience leading to evolution and constant improvement of the machinery we manufacture, with more robust chassis and structures, simple, efficient mechanics and, above all, meticulous designs that improve performance, prolonging the life of mechanisms and the machine.

After almost 40 years in the sector, we possess know how that allows us to face all the challenges the client sets us, adapting to their needs through a flexible, professional service.
