

**TEC
MAQ**

Suitable for a wide range of products and sectors.

Precise calibration and minimal vibration guaranteed.

Transmission by geared motor with variable speed drive.

Full automatic emptying.

Easy daily cleaning.

Button or touch screen control with TECMAQ CONNECT APP.

Efficient mechanics:
Minimal maintenance and high performance of wearing elements for a longer life.

Multiple options to adapt to all requirements.

HYGIENE AND CLEANING

Easy access to all hygienically critical points.

MAINTENANCE

Minimal wear of all elements, interventions required over the machine's service life are simple and speedy, and prolong the life of the machine.

ELECTRICAL EQUIPMENT

Top brand electrical components to guarantee operation and ease of maintenance.

PRECISION MACHINING

Highest standard machining process to ensure excellent fit of all assemblies. Professionals with vast experience in the sector, applying exhaustive quality control.

REINFORCED DESIGN AND CONSTRUCTION

Every machine has been designed by specialist engineers under the supervision of Josep M^a Zamora, who has more than 40 years experience in design and manufacture in the sector.

TOUCH SCREEN

The TECMAQ touch screen makes the user's work easy.

Easily programmable to adapt to each product to be processed.

Precise information on the processed product. You can check on the processed product at any time, in accordance with references in automatic mode or in kg/h production in manual mode.

Control the machine status, recommended maintenance and long-term guidelines to follow. Avoid unforeseen events and take good care of your machine easily.

TECMAQ CONNECT APP

With the TECMAQ CONNECT APP you have all the information at all times on your mobile device.

Through the APP you can:

- Set process programmes.
- Consult production.
- Check working hours.
- Current status of machine, upcoming technical servicing or maintenance history.
- Consult information and characteristics of the machine.
- Update the software.
- Secure mode for data transfer via Bluetooth.

CUT MIX

HIGH PERFORMANCE CUTTERS

120 - 200 - 300 - 500

CUT MIX 120

CUT VAC

HIGH PERFORMANCE VACUUM CUTTERS 300 - 500

With the robust and efficient design of the TECMAQ cutters, we have added the option of vacuum during the process, resulting in a product of the very highest quality.

The process with vacuum increases the density of the mix and prevents air pockets within the product.

It promotes product conservation

There is no oxidation of the fats and it delays the loss of flavour.

It improves the stability of dough to heat, even in low-protein formulas.

The combination of the vacuum process and high cutting speeds enables refining and protein unfolding for uniform emulsified products.

Result: A product with better flavour, colour and appearance.

OPTIONS AND ACCESSORIES

Button or touch screen control.

Work timer.

Trolley loader (100 L or 200 L).

Soundproof lid.

Automatic greasing.

CO₂, N₂ or Steam injection.

Water dosing device.

MORE THAN 35 YEARS DESIGNING, MANUFACTURING AND DISTRIBUTING HIGH QUALITY FOOD PROCESSING MACHINERY

When Josep M^a Zamora and Jaume Roca founded TECMAQ in 1985, they were aware that they had to design an innovative machine in order to break into the market and stand out. To do that, they listened to distributors, engineers, technologists, maintenance technicians, users, etc. with sufficient eagerness and flexibility to modify, redesign and manufacture the supplements or adaptations necessary to achieve maximum satisfaction and confidence in the end result.

We have maintained this talent over the years and gathered the experience leading to evolution and constant improvement of the machinery we manufacture, with more robust chassis and structures, simple, efficient mechanics and, above all, meticulous designs that improve performance, prolonging the life of mechanisms and the machine.

After almost 40 years in the sector, we possess know how that allows us to face all the challenges the client sets us, adapting to their needs through a flexible, professional service.
